

Patient Safety and Quality Improvement Project/ Committee Assignments

The Office of Graduate Medical Education requires all Residents/Fellows to complete a Patient Safety/Quality Improvement Project. Projects should be completed with the goal of improving the process within patient care and the learning and working environment. Projects may be completed by working in conjunction with the Medical Center or any affiliated hospital. Projects should involve inter-professional root cause analysis or other similar risk reduction teams, data to improve systems of care, reduce health care disparities, and/or improve patient outcomes.

Residents/Fellows are also expected to participate in the inter-professional quality improvement initiatives and/or committees at the Medical School, affiliated hospital or other levels.

For specific information, contact the Office of Graduate Medical Education.
