

Residents/Fellows as Teachers

Residents/Fellows will, as appropriate, assume responsibility for teaching and supervision of other Residents, Fellows and medical students. The Residency/Fellowship program will articulate to each Resident/Fellow the level of teaching that will be expected as the Resident/Fellow progresses through the various years of training.

To assist each Resident/Fellow with this responsibility the Institutional Learning Objectives for Medical Students are posted. Each Resident/Fellow should familiarize themselves with the learning objectives and refer back to them when teaching medical students.
