

## GRADING AND EVALUATION

---

Students will be evaluated and receive grades for each rotation completed, both required and elective. Rotations taken **within** the State of West Virginia will be assigned a **letter grade** while **out-of-state** electives will be issued **pass/fail** grades. For the purpose of the 4<sup>th</sup> year scheduling, approved electives may be taken within a 75 mile radius of the border of the State of WV without counting toward the 12-week out-of-state limitation.

**Marshall University School of Medicine (MUSOM) students registered for out-of-town/state electives must assume responsibility for insuring that evaluation forms are returned to the Office of Academic Affairs completed by appropriate faculty members.**

All scheduled rotations must be satisfactorily completed. Failure to do so will result in designated remedial work as determined by the Academic Standards Committee, Office of Academic Affairs and the appropriate department. Failure of a fourth year course, required or elective, may also result in dismissal.
