

ST. MARY'S MEDICAL CENTER

St. Mary's Medical Center is a not-for-profit, tertiary care, teaching hospital which is guided by the mission, philosophy and values of the Pallottine Missionary Sisters (Pallottine Health Services, Inc.), and by the Ethical and Religious Directives for Catholic Health Services. In order to fulfill its mission, the Medical Center provides acute, skilled nursing, and home health services for persons in the tri-state area and offers a broad-range of primary and specialty medical services for inpatients, outpatients and post-discharge patients.

St. Mary's Regional Heart Institute is the regional center for cardiac services including non-invasive testing, diagnostic and interventional cardiac catheterization, and open-heart surgery. Affiliated with Duke Comprehensive Cancer Center, St. Mary's Regional Cancer Center provides medical, surgical and radiation oncology services.

St. Mary's Regional Neuroscience Center treats the majority of neurosurgical patients in the Tri-State and is the only Stroke Center in the region to be certified by JCAHO. St. Mary's Medical Center offers, in partnership with Marshall University, the St. Mary's School of Nursing, the St. Mary's School of Respiratory Therapy, and the St. Mary's School of Radiography. These programs prepare individuals to pursue careers in medicine and health-care related fields. In addition, the Hospital provides continuing education programs for staff members and health and wellness programs for patients, their families, and the community in general.

In order to improve access, quality, and continuity of medical care in our community, St. Mary's strives to develop supportive networks with other health-care providers in the community and surrounding areas.
