

Academic Advising

The Office of Academic Affairs monitors student grades and professional behavior through all four years of medical school. In the MS-I and MS-II years, grades are reviewed following each block exam. Students who are evidencing academic difficulty are contacted by the Assistant Dean for Academic Affairs who works in conjunction with the student to identify barriers to adequate academic progress. Referrals are made to appropriate learning, physical and mental health providers as appropriate.

MS-III and MS-IV midpoint evaluations are forwarded and reviewed during each rotation. Again, academic concerns are addressed through communication between the Assistant Dean for Academic Affairs and the student. Referrals are made as needed.
