Were you a "traditional" student? i.e. Did you go straight from High School to College to Medical School/Graduate School? If no, please explain:

- I got a PhD. and MBA then got my MD
- Did research before medical school
- Completed pharmacy school and worked as a pharmacist for 5 years before entering medical school
- Worked 4 years after college
- I worked for a couple of years between high school and college
- I went from our equivalent of High School to Medical School
- BS/MD student in a 6 year program
- Med school after law school and work in a sales field.
- Finished PhD in India and pursued medicine at Marshall University and now preliminary year residency at Marshall
- Had family first
- I graduated high school in 11th grade in sc. I stayed out of school 2 years. Took some college classes in Oregon. Moved back to wv and worked as a secretary full time in Charleston then decided to start wv state college at night. I got a ba in psychology then went to musom from there. I was going to get a PhD in psych until I took biology and decided to apply to medical school.
- Worked couple years between college and medical school
- I skipped 12th grade, graduated college 6 months early and worked for 6 months before medical school.
- Finished masters of biomedical sciences worked 1 yr in research and teaching.
- Foreign graduate, different system.
- I took two years off between high school and college to pursue mission work and traveling.
- Exercise physiologist then technical representative for a medical device company, then med
I worked for six years after college and prior to attending medical school.
Six Year Combined college and medical school
Attended Grad school prior to medical school
completed pharmacy school and worked 7 years as hospital pharmacist then returned to medical school
