

HAZARDOUS AGENTS IN ANIMAL EXPERIMENTATION

For applications using hazardous agents or radioisotopes, prior approval and suggestions from other qualified people will need to be obtained before being submitted to the IACUC for review. This only applies to hazardous agents or radioisotopes administered to live animals as part of the experimental protocol.

1. Study involves: (check all that apply)

<input type="checkbox"/> Radioactive Material	<input type="checkbox"/> Human/Plant/Animal Pathogens	<input type="checkbox"/> Chemical Carcinogens
<input type="checkbox"/> Recombinant DNA/RNA	<input type="checkbox"/> Acute Toxins	<input type="checkbox"/> Others

2. Identify agent(s):

SPECIES	AGENT	DOSE (per kg body wt)	ROUTE	FREQUENCY

3 Risks to: _____ Animals _____ Humans

If yes, describe the potential health risks to animals or humans.

4. Describe experimental procedures:

5. Duration of study:

6. Describe all special animal care required in the use of hazardous materials:

7. Describe all special containment facility requirements:

8. Describe all special precautions for animal handlers and investigators:

9. Describe all waste and animal disposal requirements:

Signature of Investigator Date

Signature of Regulatory Official Date
